

Bruce D. Marron

1644 SE 40th Ave., Portland, OR 97214; (503) 890-5871
soil.foodwebs@gmail.com; www.linkedin.com/in/bruce-marron-05496191

Education

- Doctoral studies**, North Carolina State Univ. (NCSU), Raleigh, NC (2017)
- Doctoral studies**, Portland State Univ. (PSU) Portland, OR (2015-2017)
- M.S., Systems Science**, PSU, Portland, OR (2015)
- Fine Arts studies**, PSU, Portland, OR (1999-2000)
- M.S., Chemistry**, New Mexico Tech, Socorro, NM (1989)
- B. Sci. Ed.**, University of New Mexico, Albuquerque, NM (1985)

Certificates/Licenses/Internships/Trainings

- Graduate Certificate in Statistics, PSU, 2017
- Graduate Certificate in Sustainability, PSU, 2012
- Oregon Teaching License (Lic. 10482436; exp. 2020)
- Internship SARAR Transformación, S.C., Tepoztlán, Mexico, 2012
- Risk Assessment Seminar, Environmental Educational Enterprises, 1994
- Certificate, Project Dev. and Env. Documentation, Fed. Highway Admin., 1994
- Hazardous Waste Management under the Resource Conservation and Recovery Act (RCRA), Environmental Resource Center, 1991

Academic Awards

- National Science Foundation IGERT Fellowship, PSU
- Presidential Scholarship, University of New Mexico

Languages and Programs

English (native), Spanish (bilingual; full professional proficiency, ILR scale)
Linux, Python, SQL, AWK, sed, L^AT_EX, R, OpenOffice, TaskJuggler, Doodle, Trello, Slack, InkScape, GRASS GIS, QGIS, Google Docs

Grants

- Scheller, R (PI) and Marron, B. AgroEV: An agricultural extension for LANDIS-II. USDA-NIFA-AFRI-006353 (2017). \$149,246 (in review)
- Wakeland, W. (PI) and Marron, B. The Systems Science Academy: A training vehicle to cultivate STEM innovators. NSF 12-597 (2012). \$1,194,047 (not funded)

Presentations

- Presentations to NCSU faculty, PSU faculty, and community stakeholders (2011-2017)
- Presentation at US-IALE Conference (2016)
- Presentation to City of Portland (Victory Garden Plus! program) (2012)
- Presentation at EcoDistricts Summit (The Harvest Club model) (2011)
- Presentations to the Richmond Neighborhood Assoc. (Sustainability Committee chair) (2010-2011)
- Presentations to Portland Public School students and parents (2000-2010)
- Presentations as guest lecturer in regulatory compliance, University of New Mexico (1998)
- Presentations at public meetings under the National Env. Policy Act (NEPA) (1994-1998)

Relevant Experience

Dynamic Ecosystems and Landscapes Lab, Raleigh, North Carolina 2016-present
(Dr. Robert Scheller, Director; Dr. Eric Gustafson, US Forest Service client)
Project manager, QAQC officer, and productivity designer for updates, upgrades, and corrections to the LANDIS-II forest landscape change model and its various extensions; manager responsible for hiring and oversight of programmers, tracking programmer work hours, and the production of weekly project status reports; QAQC officer responsible for designing and monitoring QAQC protocols, version control using Git and GitHub, and model testing to produce well-documented, model-verified results; productivity designer responsible for designing productivity enhancement tools using Trello and Slack.

- United Way of the Columbia-Willamette, Portland, Oregon* 2015
(Alejandro Queral, Director Systems Planning and Performance)
Program development specialist (*pro bono*); author responsible for production of the Machine Learning Pilot Project (MLPP) proposal document, “*Machine Learning Tools for Social Service Providers Funded by the United Way of the Columbia-Willamette*” and the MLPP final report, “*The Use of a Naive Bayes Classifier on Social Services Data*”. The MLPP was designed to determine if simple machine learning tools would prove useful to individual social service organizations in helping them assess their own system of social service provisioning.
- Catholic Charities, Portland, Oregon* 2015
(Vilma Chan Vasquez, School Based Services Program Manager)
Curriculum development specialist and math teacher for “*Puentes*”, an eight-week, summer program for Latino youth; responsible for curriculum design and implementation. The Puentes program provided a structured but home-like environment for kids needing extra help in English and mathematics. Much of the interaction and instruction was in Spanish.
- Oregon Environmental Council, Portland, Oregon* 2014
(Allison Hensey, Sustainable Agriculture and Watersheds Program)
Consultant and technical specialist; author responsible for production of a white paper evaluating the impact of reactive nitrogen from agricultural activities on human health and the environment. The paper included recommendations and suggested strategies aimed specifically at conserving natural resources for future Oregonians.
- Re-Generar, Portland, Oregon* 2014-present
(Dr. Leopoldo Rodriguez, President)
Founding board member and executive director; designer responsible for logo creation and letterhead; author responsible for production of the 501(c)(3) application to the IRS; office manager responsible for documentation and record keeping. Re-Generar’s mission is to promote sustainable development by providing non-profit consulting services directly to on-the-ground, local organizations that work for social justice, economic equity, and environmental health. The organization views sustainable development as transformations that are crafted to maximize human well-being and minimize planetary harm. The organization fully supports the United Nations Millennium Development Goals. To date, Re-Generar has not been active as Dr. Rodriguez is currently in Argentina.
- Green Machine Biofuels, Inc., Portland, Oregon* 2004-2007
(Bruce Marron, President)
Founder and president of Green Machine Biofuels, Inc., a small company for the production of expeller-pressed organic cooking oils and protein-rich seed cakes; responsible for all aspects of brand development, marketing, promotional events, sales, and bookkeeping. Green Machine Biofuels, Inc. sold wholesale to local food co-ops and had direct sales to the public as a vendor at the Portland Farmers Market.
- Farmin’ on 40th, Portland, Oregon* 2004-present
(Bruce Marron, Permaculture Designer)
Permaculture designer responsible for conversion of a city lot (100’ x 50’) into an urban organic farm; designer and builder responsible for installation of rainwater catchment (2750 gal.) system; construction of raised bed gardens, a small greenhouse with hydroponics, and a composting area for year-round food production; plantings of almond, fig, cherry, plum, and walnut trees for fruit and nut production; construction of an eco-roof for rooftop gardens and grape production; construction of a seed vault for saving and cataloging open-pollinated heirloom garden seed; and use of equipment for small-scale food processing and preservation.
- Portland Public School, Portland, Oregon* 2000-2010
(Toni Hunter, Grant HS; Peg Lewis, Kellogg MS)
Curriculum development specialist; author and designer responsible for production of the HS curriculum entitled, “Sustainability: Transitioning to Adaptive Resilience in a Post-Carbon World”; author and designer responsible for production of spreadsheet-based, qualitative analysis curriculum; logistics manager responsible for maintenance of chemistry lab equipment and supplies; volunteer manager responsible for recruitment and management of student

and parent volunteers; teacher responsible for designing and implementing classes in chemistry, foundations of physics and chemistry, and forensic science (HS); teacher responsible for designing and implementing classes in math, science and health (MS)); first aid, CPR, and AED trained.

Marron and Associates, Inc., Albuquerque, New Mexico 1994-1998
(Ken Marron, CEO and founder)

Project manager and regulatory compliance specialist; author responsible for production of NEPA environmental assessment documents, Section 404/401 permit applications, NPDES permit applications, and environmental regulatory compliance strategies for hazardous and solid waste disposal; guest lecturer in environmental regulatory compliance at Univ. of New Mexico; presenter and facilitator at NEPA public meetings.

Benchmark Environmental Corporation, Albuquerque, New Mexico 1990-1994
(Karen Knudtsen, VP and Director of TRU and Mixed Waste Services Group)

Project manager and regulatory compliance specialist; project manager responsible for production of a report on the comparative assessment of chemical and radionuclide risks for the Waste Isolation Pilot Plant (WIPP); responsible for setting the SW-846 method detection limits for transuranic, mixed waste analysis at Los Alamos Nat'l Lab (LANL); author of position paper defining Dept. of Energy's RCRA compliance approach to EPA's headspace flammability requirements; author of executive summary of the WIPP Quality Assurance Program Plan; author of the section on radiological monitoring of foodstuffs for the Environmental Monitoring Plan in support of LANL's compliance with DOE Orders 5400.1 and 5400.5.

Brewer Analytical Labs, Papaikou, Hawaii 1989-1990
(Dr. Douglas Root, Laboratory Director)

Environmental analytical chemist performing GC/MS and GC/ECD/PID analysis of environmental samples including soils from potentially leaking underground storage tanks (LUSTs).

Organizations and Service

American Evaluation Association (member)

Union of Concerned Scientists (member)

Seed Savers Exchange (member)

On-the-Move Community Integration, founding board member and volunteer (2005-2010)

Richmond Neighborhood Association, board member and committee chair (2010-2011)

Portland Fruit Tree Project, volunteer team coordinator (2010-2011)

Volunteer firefighter (1974-1976)
